

ANNOUNCEMENT

The European Society of Breast Cancer Specialists, The European Society of Surgical Oncology, The European School of Oncology and The European Oncology Nursing Society are pleased to announce their Training Project on

“The multidisciplinary approach in Breast Cancer Care”

One month of training in a European Breast Unit
between April and July 2010

Prior to the training period the selected candidates will be offered a comprehensive teaching package

Aim of this programme is to allow young health professionals dedicated to breast cancer to improve their theoretical knowledge on breast cancer care and their working skills with the aim to create a core team made up of health professionals from various disciplines who have undergone specialist training in breast cancer beyond that given in general training. For each speciality the training period will offer a special “Focus on” on an important issue related to the specialty, such: onco-plastic surgery, MRI, new approaches in radiotherapy treatment options, tailored systemic treatment, ect.

Training Fellowship by competitive application Final deadline for application: 31st January 2010

Only complete applications will be taken into consideration

- ◆ Potential candidates have a maximum age of 40 years for MDs and physicists and 45 years for nurses and radiographers
- ◆ Priority will be given to applicants already working in the field of breast cancer (radiologists, pathologists, surgeons, radiotherapists, medical oncologists, physicists, breast care nurses and radiographers)
- ◆ Candidates from Eastern Europe will be given the priority
- ◆ A good knowledge of the English language is required

Interested candidates should send a copy of their curriculum vitae in English, together with an accompanying letter of recommendation from the Head of the Department that they are working in and a covering letter explaining their motivation and the special interest on which they wish to focus on. Successful candidates will be notified on 1st March 2010
